SUMMARY

Full Stack Developer with expertise in Python, JavaScript, and Django. Proven ability to design scalable applications with RESTful APIs, database optimization, and responsive UI/UX. Experienced in end-to-end development from backend architecture to frontend implementation, passionate about creating efficient, user-centric solutions.

EDUCATION

University of Mumbai

BSc. Information Technology — CGPA: 7.0

Mumbai, India

2022 – 2025

Ramanand Arya DAV College

HSC — 70%

Mumbai, India

2020 – 2022

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Frontend: React, HTML5, CSS3, Tailwind CSS

Backend: Django, Django REST Framework

Databases: PostgreSQL, Oracle SQL

Version Control: Git, GitHub

Data Analysis & Visualization: NumPy, Pandas, Matplotlib

PROJECTS

NOIRL | *Premium Full-Stack E-Commerce Platform* | 🌐 Live Demo

2026

- Built a production-grade luxury e-commerce platform using **Django REST Framework** and **React**, featuring product catalog, cart, orders, and wishlist with a scalable **PostgreSQL** backend.
- Integrated **Razorpay** payment gateway with dual-currency support (INR/USD) and deployed the full-stack application in a production environment with cloud-based media storage.

Service Seller Web Dashboard | *React, Node.js, JWT*

Sep 2024 – Jan 2025

- Developed a full-stack service marketplace with **role-based access control** for Admin, Customer, and Worker roles, including real-time notifications and complete job lifecycle management.

TankMate | *Smart Tank Selection & Cost Optimization* | 🌐 Live Demo

Jan-2026

- Built an internal web tool using **Django** to automate industrial tank selection, capacity matching, and cost comparison for sales teams, replacing manual Excel-based workflows.
- Implemented a **CSV-based data engine** with custom Django management commands for bulk import, enabling easy data updates without modifying backend logic.

Flipkart Clone | *Full Stack E-Commerce Application* | 🌐 Live Demo

Dec-2025

- Built a feature-rich e-commerce platform using **Django** with user authentication, product catalog, cart & checkout, order tracking, wishlist, product reviews & ratings, and a **gift card system**.
- Engineered a **PDF report generation** and **Excel export** system for admin order management, alongside real-time notifications and advanced search with **AJAX** for a seamless shopping experience.

LeadSpot CRM | *Django, PostgreSQL, JavaScript*

Jan-2026

- Designed a full-stack **CRM system** with lead and sales pipeline management, follow-up tracking, meeting scheduling, and a **REST API** enabling full-database search across all lead records.
- Built role-based authentication, secure data handling, and real-time analytics dashboards for sales performance monitoring and conversion tracking.

ACHIEVEMENTS

- Developed and deployed fully functional Django-based web applications in production environments
- Contributed to open-source projects on GitHub
- Completed multiple online courses on Python and web development
- Successfully led small teams in project development and implementation
